

Smartowel BIO-D Wipe

Oshiklenz Smartowel Bio-D is a green, sustainable solution to solve the day to day problems for consumers while improving their own personal hygiene in a more responsible and sustainable way. It is also hygienically and individually packed in a 100% degradable wrapper. Australia's first 100% bio-degradable wipes.

Oshiklenz Smartowel BIO-D Wipe

*Gently wipe the towel
on your skin or any
food surface, utensils,
cutlery, kitchen
equipment or any
areas that come into
contact with food.*

Description

Australia's first 100% bio-degradable wipe, including its wrapper in the Australian market. Our Oshiklenz Smartowel BIO-D wipe is the newest innovation for Oshiklenz. This unique product was specially formulated with pure, unscented, non-toxic, and natural plant-based ingredients that are free from harsh chemicals that can trigger skin irritation or pose a long term health risk.

Oshiklenz Smartowel Bio-D is also made from ultra-soft and premium quality 100% Viscose fibres from Austria. This fibre is certified and tested free from harmful substances. When composted, the viscose fibres are converted back into pure water and carbon dioxide which are reabsorbed by the next generation of trees. It is also hygienically and individually packed in a 100% degradable wrapper. This Green Label certified wrapper will undergo oxo-degradation and will be biodegraded to carbon dioxide (CO₂), H₂O and biomass making Oshiklenz Smartowel Bio-D the only disposable wipes in the market that are 100% Biodegradable and environmental-friendly.

Features

- For use in cleaning hands, external mouth area, or any skin area and food contact surfaces without a rinse after application.
- Formulated and designed to clean and kill germs without any chemical residues left behind.
- More effective, efficient, sanitary and eco-friendly replacement to dry bleached tissue or reusable cloths due to its tear-free, hygienic and 100% bio-degradable properties.
- An environmental-friendly wet wipes alternative which is easy to dispose of since they are completely bio-degradable and compostable
